Ratchet

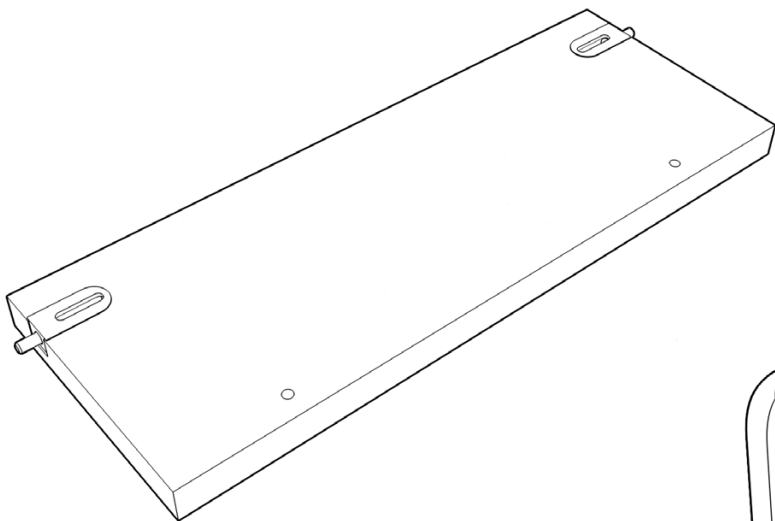

Long Hex Bit

Note: Please retain all boxes until you are certain that your product isn't damaged and that you do not wish to return it. Disposal of boxes may prevent/delay our ability to resolve your request.

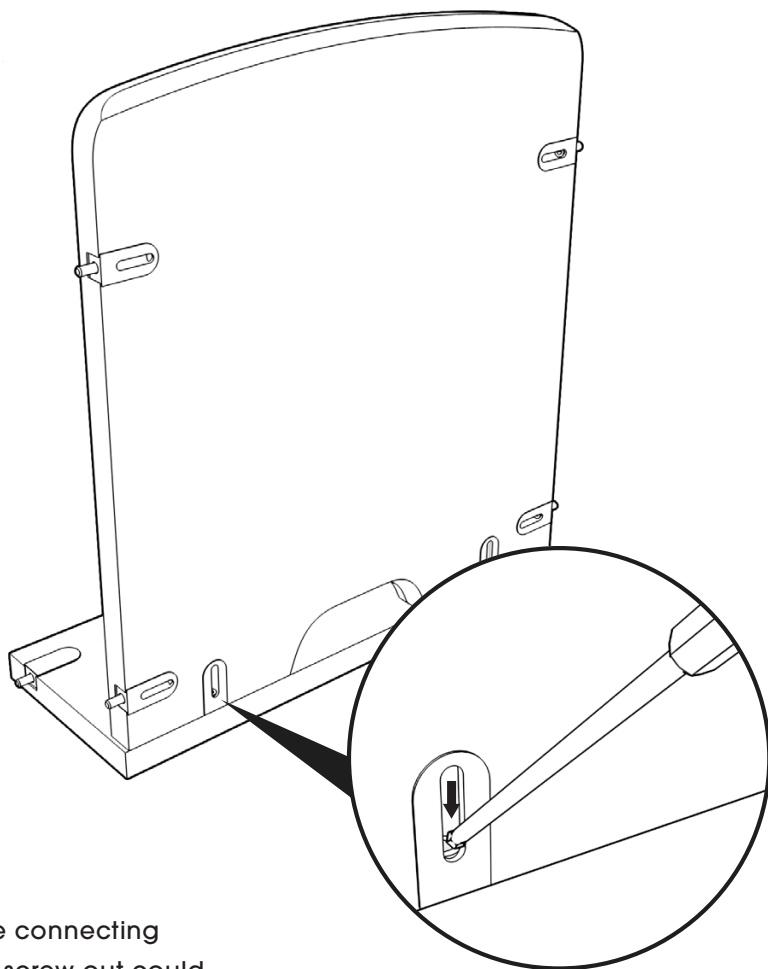

Step 1: Attach Bottom Shelf to Back Panel

Start by placing the back panel with the pocket side up on a soft surface so that you don't damage your piece.

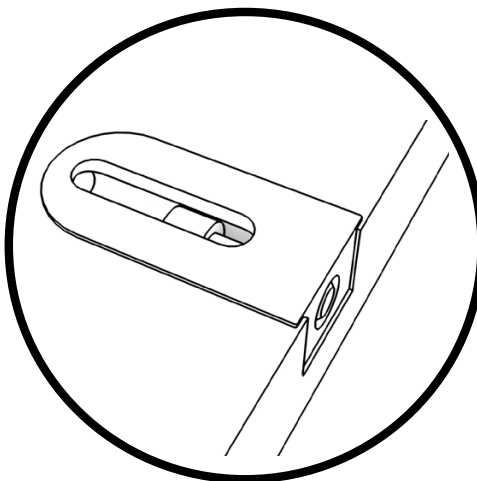

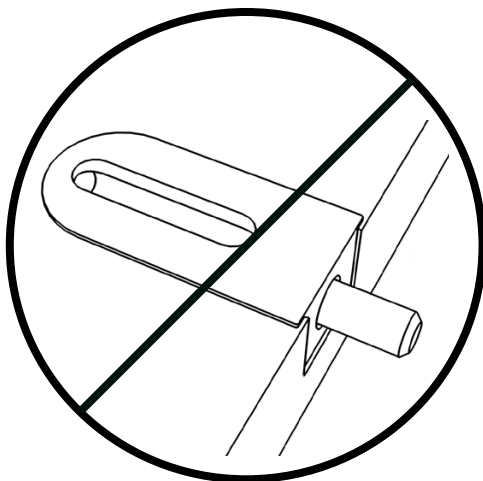

Next, take the bottom shelf with the connectors facing out and align the rear mounting holes with the corresponding holes on the back panel.

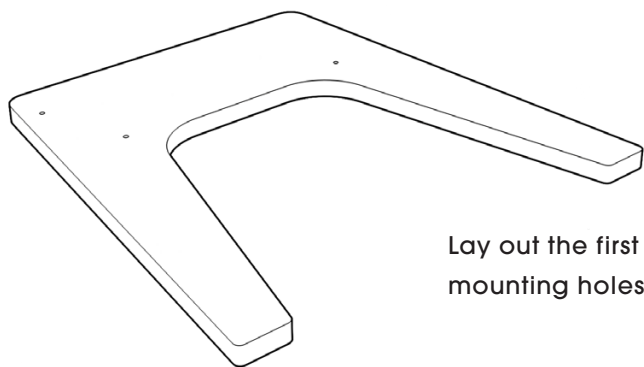

Fasten to the back using the provided ratchet and long hex bit. The plastic connectors have covers which can be placed on after all bolts are in place.

Note: When fitting the pieces together, make sure the connecting screws are retracted inside their housing. Having the screw out could damage your surfaces.

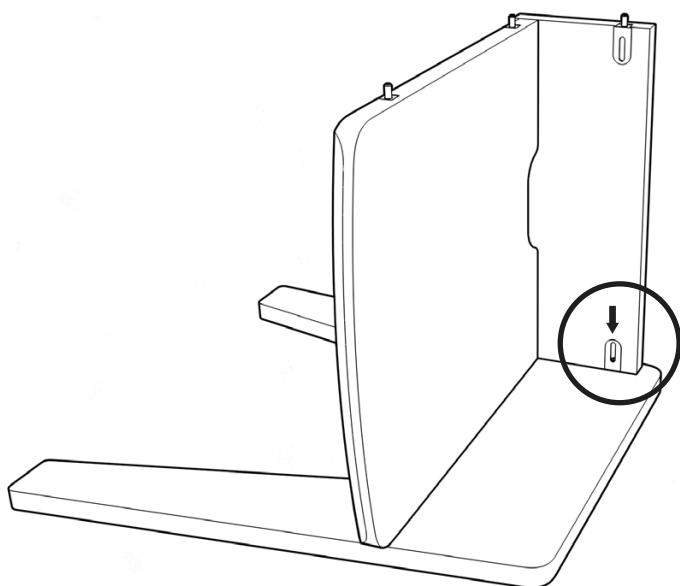

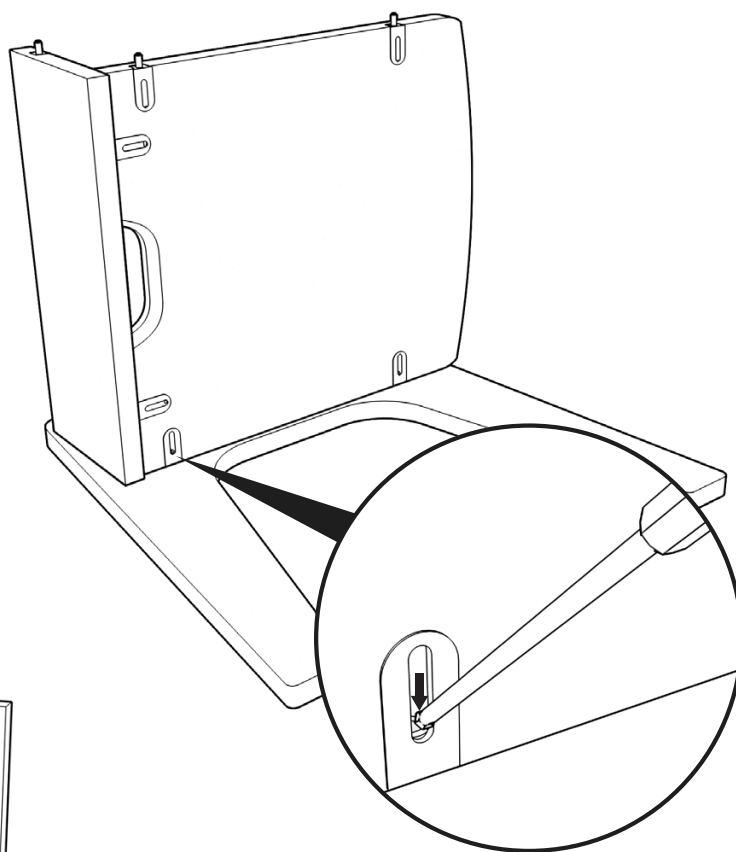

Step 2: Attach First Leg

Lay out the first leg with the mounting holes facing up.

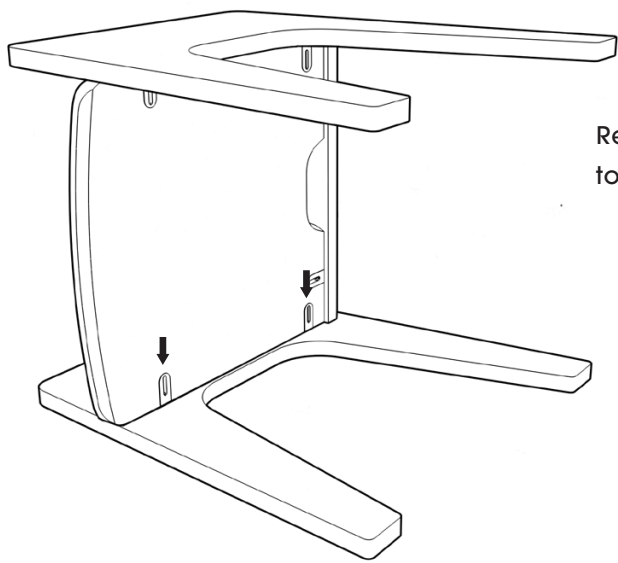

Align the connectors on the bottom shelf with the corresponding holes on the leg.

Fasten the shelf and back panel to the leg.

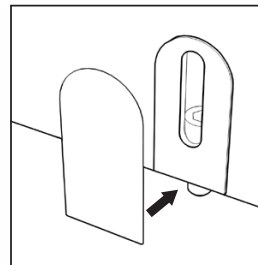

Rotate the table around and fasten the connector in the upper portion of the back panel.

Step 3: Attach Second Leg

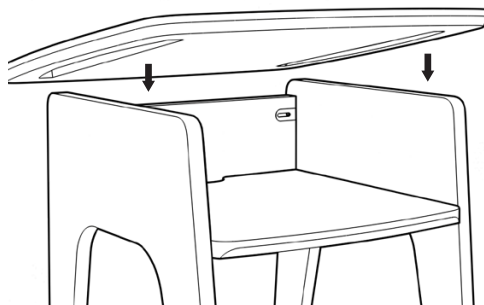

Repeat the previous directions to attach the second leg.

Use plastic covers to cover bolt openings after all are tightened.

Step 4: Place Top

Flip side table base on feet, and place on the removable table top.

DONE!
